

Job Title: Remote Full Stack JSP Developer

Location: Remote

Company Overview: Must Crew is a forward-thinking global IT company dedicated to pushing the boundaries of innovation in digital solutions. We are committed to fostering a dynamic and collaborative work environment where talented individuals can thrive and make a meaningful impact.

Position Overview: We are currently seeking a talented and experienced Full Stack JSP Developer with a minimum of three years of experience to join our team. The ideal candidate will have a proven track record of developing robust and scalable web applications using JavaServer Pages (JSP) technology, along with expertise in both front-end and back-end development.

Key Responsibilities:

- Develop and maintain full stack web applications using JavaServer Pages (JSP) technology for front-end and back-end functionalities.
- Implement complete CRUD (Create, Read, Update, Delete) operations ensuring seamless data management and user interaction.
- Design and optimize database schemas, write efficient SQL queries, and ensure data integrity and security.
- Collaborate with cross-functional teams to gather requirements, design solutions, and implement features that meet business needs.
- Write clean, efficient, and maintainable code following best practices and coding standards.
- Implement responsive and user-friendly front-end interfaces using HTML, CSS, JavaScript, and modern front-end frameworks/libraries.
- Design and optimize database schemas, write SQL queries, and implement database interactions to support application functionality.
- Utilize Java programming language and Spring framework for back-end development, including Spring MVC, Spring Boot, and other Spring modules.
- Integrate MyBatis framework for data persistence and object-relational mapping (ORM) in Java applications.
- Perform thorough testing and debugging to ensure the reliability, security, and performance of the applications.
- Stay up-to-date with emerging technologies and industry trends, and incorporate them into the development process as appropriate.
- Participate in code reviews, provide constructive feedback, and mentor junior team members to foster a culture of continuous learning and improvement.

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or related field.
- Minimum of three years of experience as a Full Stack Developer, with a focus on JavaServer Pages (JSP) technology.
- Strong proficiency in Java programming language and related frameworks, particularly the Spring framework (e.g., Spring MVC, Spring Boot).
- Extensive experience in front-end development using HTML, CSS, JavaScript, and front-end frameworks/libraries (e.g., React, Angular, Vue.js).

- Solid understanding of web development concepts and technologies, including RESTful APIs, AJAX, and JSON.
- Experience with relational databases (e.g., MySQL, PostgreSQL) and proficiency in writing optimized SQL queries.
- Familiarity with MyBatis framework for data persistence and ORM in Java applications.
- Familiarity with version control systems (e.g., Git) and agile software development methodologies.
- Excellent problem-solving skills, attention to detail, and ability to work independently or collaboratively in a team environment.
- Strong communication and interpersonal skills.

Preferred Qualifications:

- Experience with cloud platforms (e.g., AWS, Azure, Google Cloud Platform) and deployment of web applications.
- Knowledge of web security best practices and techniques.
- Certification in Java or related technologies.

Benefits:

- Competitive salary
- Comprehensive health benefits package
- Flexible work hours and remote work options
- Opportunities for professional development and career advancement
- Dynamic and collaborative work environment

If you are a talented and experienced Full Stack JSP Developer looking for an exciting opportunity to contribute to innovative projects, we encourage you to apply and join our dynamic team. To know more about our Company: mufin.co.kr

Requirements:

The ideal candidate will be responsible for developing and maintaining fully functional CRUD applications, demonstrating expertise in both front-end and back-end development.

1. Full Stack JSP Developer. Spring framework (e.g., Spring MVC, Spring Boot) + Experience with relational databases (e.g., MySQL, PostgreSQL) + MyBatis framework for data persistence + Tomcat
2. Quest/Demo (Required) If you are interested, we will invite you with your email.
3. Loom Video explaining the Quest/Demo
4. Live server link of the Quest/Demo
5. Zip file of the code
